

IMPORTANT :

- The **DNA sample MUST be collected and authenticated by a veterinarian** to be officially recognised.
- It is necessary to make a good taking (taking of oral cells, no saliva) to obtain a good result.
- For puppies or not identified kittens, the veterinarian will make a pre-identification. We will transmit you then temporary report in expectation of definitive identification (Then it will be necessary to send back to us the order form of taking signed by the veterinarian giving evidence that the chipnumber / tattoo corresponds to the taken dog).

How to collect the DNA ?

Step 1 :

- Write your **adress, phone number, the test you want with coordinates of your animal** and your authorization for the data transfer on the order form.

- Then your veterinarian will write his adress and phone number and will **control the coordinates of the taking animal (name, date of birth, race, tatoo, chipnumber...)**

Step 2 :

- Place the brush **between the gum and the cheek**.

- **Firmly rotate the brush** inside the mouth at least 20 times in order to get back oral cells which contain the DNA of the animal (no taking of saliva).

Step 3 :

- **Cut** the brush's stem at about **1 cm** from the brush and place the brush inside the provided collection tube and control that there is always some ethanol in the tube (without ethanol, buccal cells will not be preserved).

- **Close the tube** and place it in the small plastic bag..

- **Stick the label (SAMPLE 0000-000)** on the DNA order form. This label allows to make the link between the tube and the order form.

Once all the samples have been processed, place them in a **padded envelopp** along with :

- **Sample** collection kit in the plastic bag,
- **Payment** (check adressed to GENINDEXE or bank transfer)
- The **DNA collection form properly filled out and signed**.

Payment in euros to GENINDEXE – CREDIT AGRICOLE CMDS – 17000 LA ROCHELLE – France

IBAN Adress : International Bank Account Number

/F/R/7/6/ /1/1/7/0/ /6/1/1/0/ /3/5/5/2/ /5/8/3/7/ /9/1/0/0/ /1/5/2/

BIC swift Bank Identification Code: AGRIFRPP817

Please precise your name and which test you want in the payment by bank transfer.

Warning : Without payment join to samples analyses can't be realized.

DNA sample collection and order form Dogs-Cats

Dog

Cat

Partner Code _____

I want to receive a report by post (+ 6€)

Modalities :

- **Join the payment** (check or proof of transfer) and the proof for Partner Code
- If there is no ethanol in the tube, make a sampling of blood on mauve tube EDTA
- The animal must not have eaten or drunk for at least one hour
- **In case of demand of filiation**, you will have to join the authorization of the owners for the use of the genetic identification of the parents when the father or the mother does not belong to you and their DNA code (if they were genetically identified by Genindexe) or the copy of the analyses' report (If they were genetically identified in another laboratory).
- **From 4 analyses asked on the same individual, please send us 2 sample collection kits.**

OWNER : <input type="checkbox"/> I want to receive an invoice.
